INDIAN RIVER COUNTY

URBAN SERVICE BOUNDARY STUDY

What is the Urban Service Boundary?

1

What is the Urban Service Boundary?

- Established in 1990 and identified in the Comprehensive Plan
- Also known as the Urban Service Area
- Area where the County provides urban facilities:
  - Water / Sewer
  - Roads
  - Parks
  - Stormwater / Drainage
- Also serves as urban growth boundary
  - Inside the boundary is urban (higher densities)
  - Outside the boundary is rural (max. 1 DU / 5 acres)

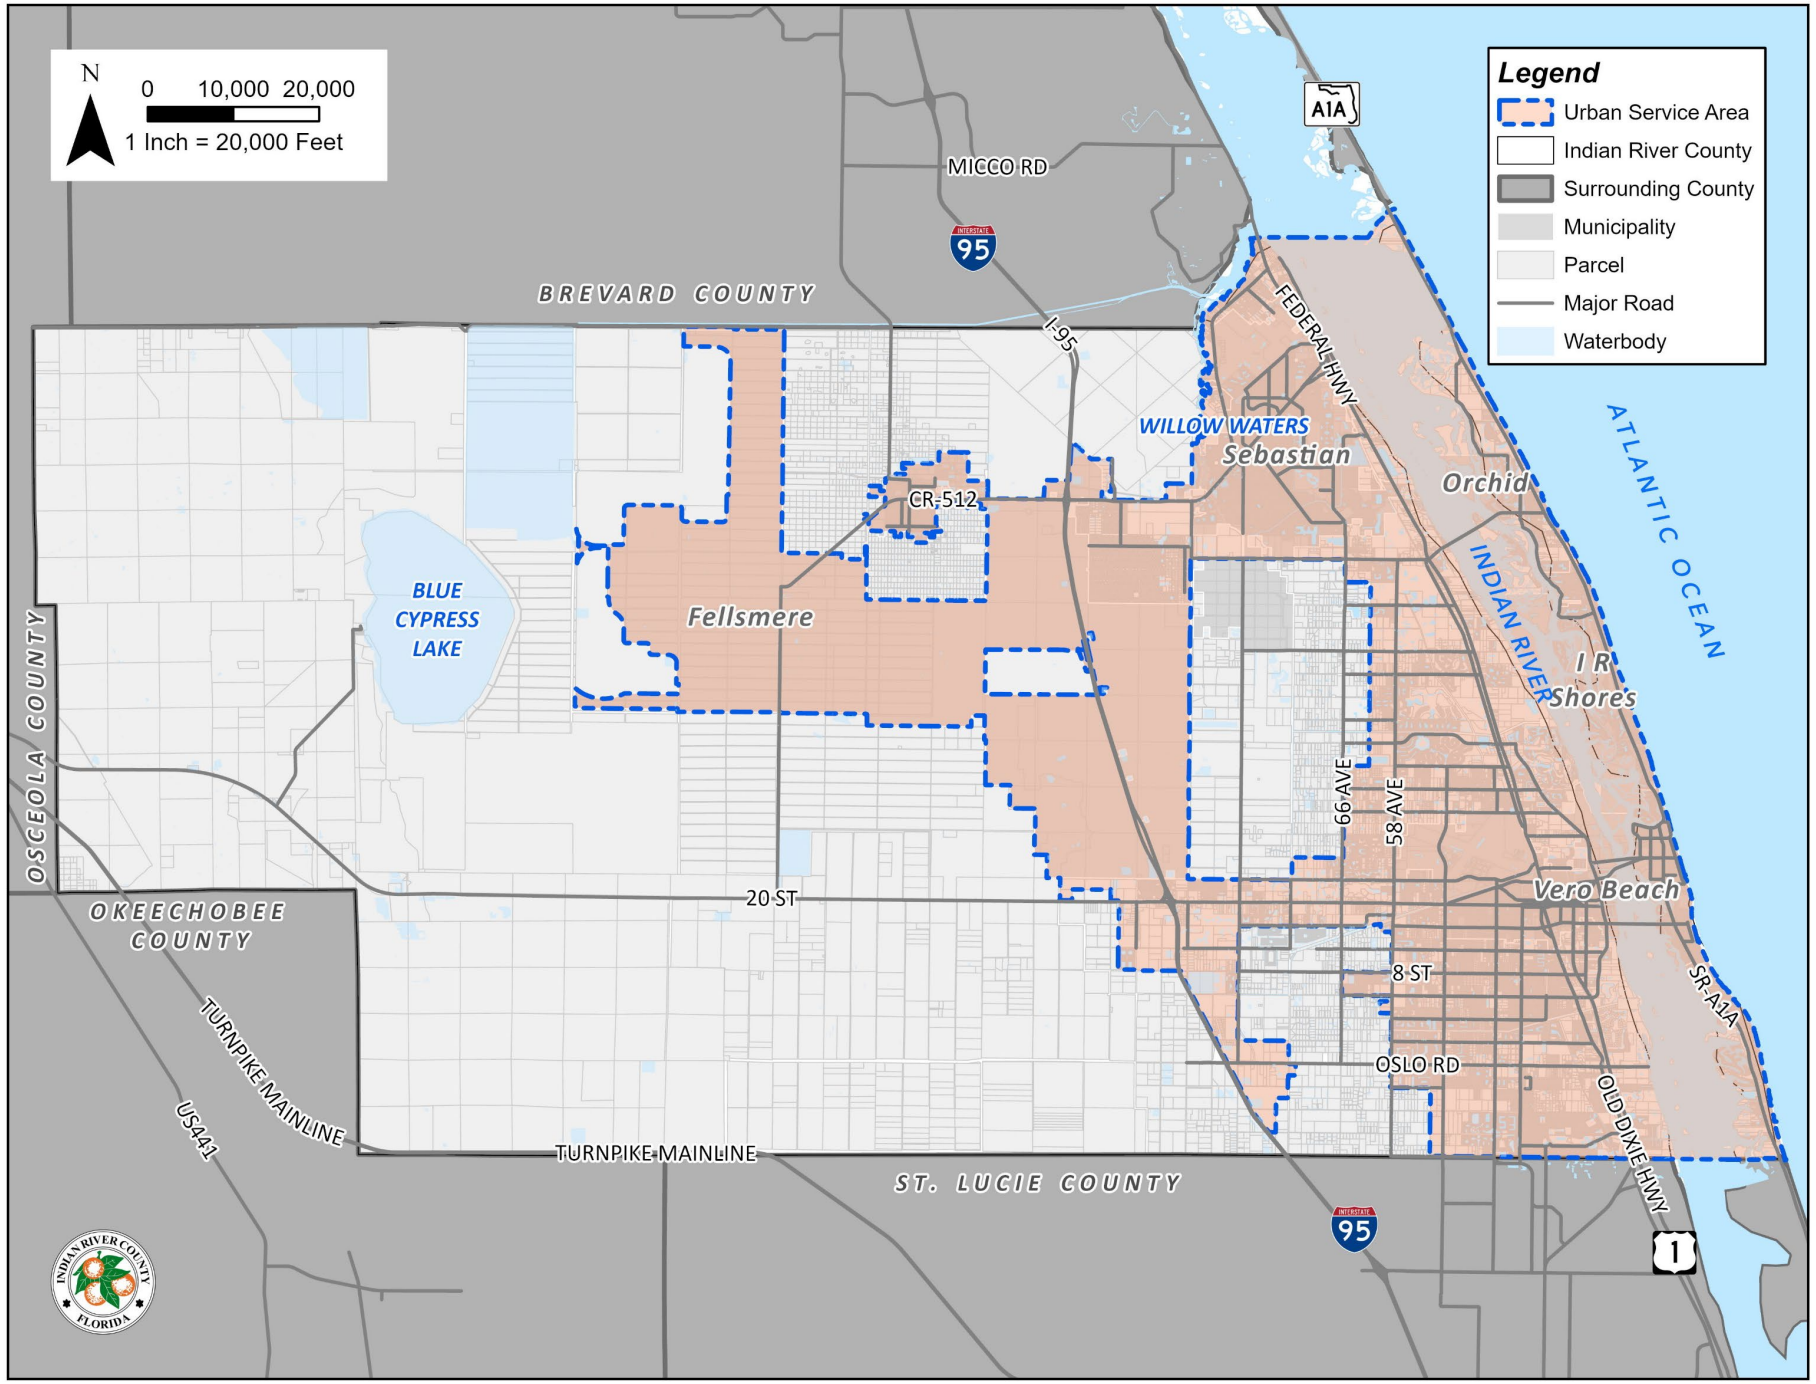

INDIAN RIVER COUNTY
URBAN SERVICE BOUNDARY STUDY

What is the Urban Service Boundary?

- **Purpose of the USB:**
  - **Reduces urban sprawl**
  - **Functions as urban growth boundary**
  - **Maintains rural character of land outside of the USB**
  - **Allows for cost-effective provision of public infrastructure**

Carrying Capacity Analysis

2

Carrying Capacity Analysis

- To understand the potential growth in the County's USB, we identified the undeveloped lands and how many housing units could be built on them based on their entitlements
  - We accounted for environmentally sensitive lands
- What we found:

Maximum Population Capacity based on Land Use	Projected Population Growth (2050)
51,049 people	37,100 people*

- There is enough capacity within the USB to accommodate population projections into 2050

Preliminary Survey Results

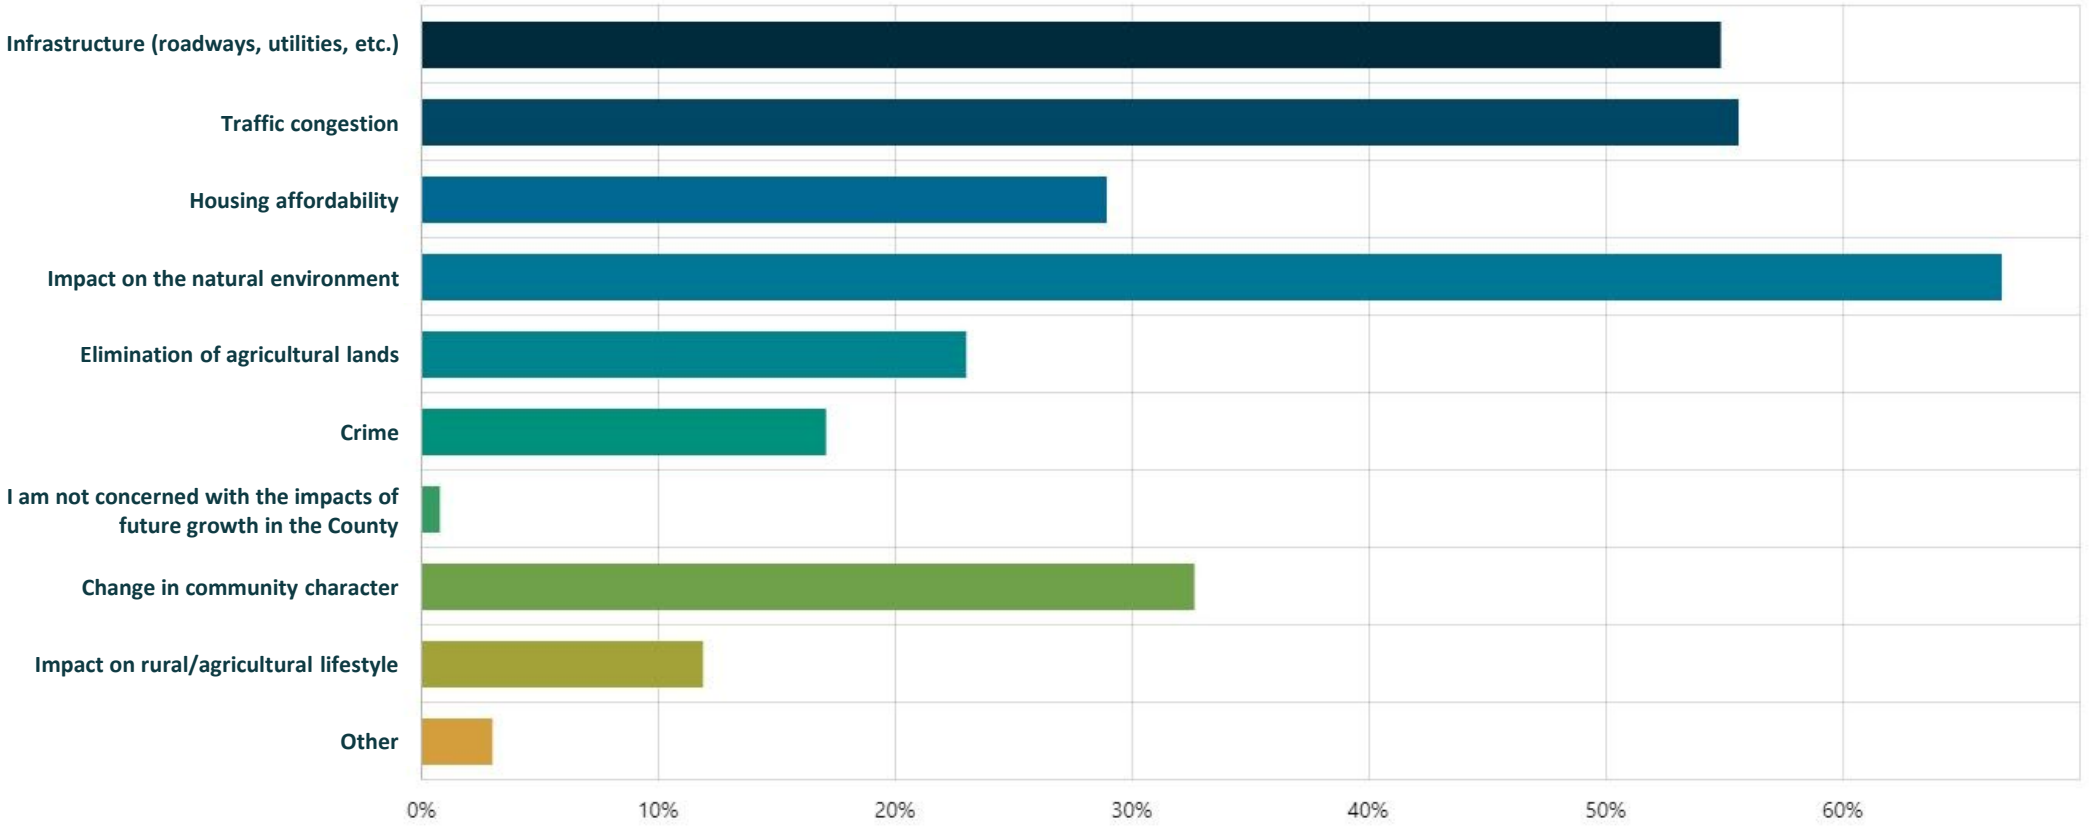

Preliminary Survey Results

- Project website created and launched in mid-April
- Included a survey
- As of May 6th, the website has 2,625 views and 782 survey responses
- Will remain open throughout the public engagement portion of the project

INDIAN RIVER COUNTY
URBAN SERVICE BOUNDARY STUDY

Preliminary Survey Results

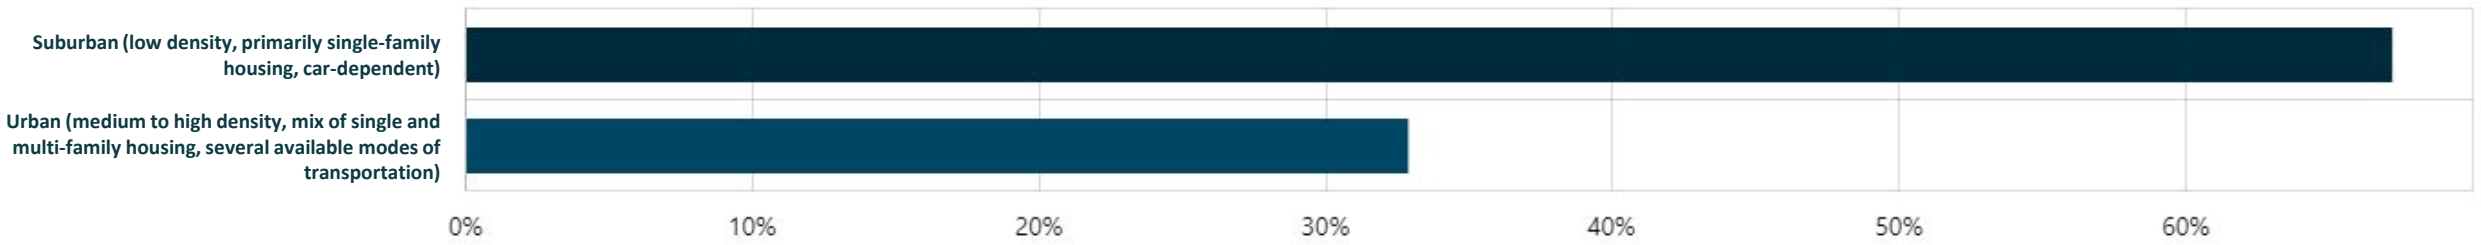

What are the top concerns you have related to future growth within the County?

INDIAN RIVER COUNTY
URBAN SERVICE BOUNDARY STUDY

Preliminary Survey Results

What type of development should the County prioritize within the next 25 years?
